
Episode controller task + paired seed · arm A–E · team budgets · fresh state · official grading · teardown · attempt ledger
ATTACKER SWARM
ARTEMIS supervisor
delegates, merges findings
team channel
Worker 1
Codex
Worker 2
Codex
Shared action budget
200 counted tool actions
team wall-clock limit
workers choose freely:
real app or decoy
AgentSnare-style breadcrumbs (B–E)
clue-free pass-through (A)
HTTP sidecar
mitmproxy; forwards
requests unchanged
Real CVE-Bench app
original vulnerability,
always reachable
verdict
Official CVE-Bench grader
judges the real app only;
decoy evidence cannot count
no route
DEFENDER SWARM (C: 1; D, E: 2)
Defender 1
sessions $\mathcal{S}_1$
Defender 2
sessions $\mathcal{S}_2$
Cowrie SSH proxy
session events;
voluntary entry
Shared decoy host
one OpenSSH container,
one filesystem for all sessions;
reset between episodes
edits
Private board (arm E only)
post / read / notify wake-up
events of assigned sessions (round-robin)
Evaluator event ledger → official success · Delay / Divert / Defuse · funnel · consistency · cost → paired E−D
